

### TOP 10 CHARTER COMMUNITIES BY MARKET SHARE Third Annual Edition

# Todd Ziebarth Vice President for Policy, National Alliance for Public Charter Schools October 2008

Today, a record 12 communities have at least 20% of their public school students enrolled in public charter schools, double the number from just two years ago. Additionally, 64 communities now have at least 10% of public school students in charter schools. These numbers illustrate that charter enrollment growth at the community level remains strong.

For the third year in a row, the National Alliance for Public Charter Schools has gathered public school enrollment data from around the country to find the highest local proportions of students enrolled in public charter schools. The table below shows the results for the 2007-08 school year.

The "Top 10"

\_

Community	Charter Market Share	<u>Charter</u>	Non-Charter	<u>All</u>	Rank and Market Share in 2007
1. New Orleans, LA	55%	17,925	14,962	32,887	#1 and 57%
2. Washington, DC	31%	22,175	50,270	72,445	Tied at #2 and 27%
3. Southfield, MI	28%	3,638	9,372	13,010	Tied at #2 and 27%
Dayton, OH	28%	6,252	16,241	22,493	Tied at #2 and 27%
4. Pontiac, MI	25%	2,649	8,162	10,811	Tied at #3 and 23%
5. Youngstown, OH	24%	2,663	8,282	10,945	Tied at #3 and 23%
6. Phoenix Union High	23%	7,901	26,450	34,351	Not Available <sup>1</sup>
School District, AZ					T
Kansas City, MO	23%	7,134	24,449	31,583	Tied at #4 and 20%
7. Detroit, MI	22%	30,433	105,554	135,987	Tied at #4 and 20%
San Antonio, TX	22%	13,015	45,888	58,903	Not Available <sup>2</sup>

<sup>&</sup>lt;sup>1</sup> For the first and second editions of the "Top 10 Charter Communities by Market Share" report, we were able to get charter school enrollment data by the county where charter schools were located in Arizona, but not by the school districts where they were located. For this edition of this report, we were able to get the data by school district and reported it that way so that Arizona's data is consistent with the data from the other states.

8. Tempe Union High	21%	3,714	13,702	17,416	Not Available <sup>3</sup>
School District, AZ					
9. Cleveland, OH	20%	12,674	50,175	62,849	Tied at #6 and 17%
10. St. Louis, MO	19%	7,726	32,135	39,861	Tied at #8 and 15%
Toledo, OH	19%	6,428	28,129	34,557	#5 and 18%

#### A Closer Look

Twelve Communities Now at 20% or More: In the first year that we compiled this report, a market share of 20% would land a community at #4. This year, such a concentration puts a community at #9. The number of communities with at least a 20% market share has steadily climbed from six in 2005-06 to eight in 2006-07 to 12 in 2007-08.

The Floor for the "Top 10" List Jumped from 13% to 19%: For the first two years that we assembled this report, the 10<sup>th</sup> highest market share percentage happened to work out to the same number – 13%. Because of the strong and steady growth in charter enrollment in several communities, the 10<sup>th</sup> highest market share percentage this year is 19%. It's worth noting, however, that the number of communities with at least a 13% market share has steadily climbed from 19 in 2005-06 to 29 in 2006-07 to 42 in 2007-08. And there are 64 communities with at least a 10% market share (see Appendix A on pp. 4-5 for a list of these communities).

**New Orleans Remains at #1:** More than three years since New Orleans began rebuilding its public education system after Hurricane Katrina, public charter schools continue to play a primary role in these efforts. Not only are charters in New Orleans serving a higher percentage of public school students – 55% – than anywhere else in the nation. They are also the highest performing sector of public schools in the city. More importantly, the city's public schools as a whole are already outperforming the pre-Katrina system.

Washington, D.C. Stands Alone at #2: The percentage of public school students enrolled in charters in Washington, D.C. jumped from 27% in 2006-07 to 31% in 2007-08. Because of this surge in enrollment, D.C. pulled away from the two other communities with which it was tied at the second spot last year (Dayton, OH and Southfield, MI). With six parochial schools closing and reopening as public charters in 2008-09, charter enrollment in D.C. is sure to leap again next year, further solidifying D.C.'s status as the community with the second largest concentration of public school students enrolled in public charters.

<sup>&</sup>lt;sup>2</sup> For the first and second editions of the "Top 10 Charter Communities by Market Share" report, we were able to get charter school enrollment data by the metropolitan area where charter schools were located in Texas, but not by the school districts where they were located. For this edition of this report, we were able to get the data by school district and reported it that way so that Texas's data is consistent with the data from the other states.

<sup>&</sup>lt;sup>3</sup> See Footnote #1.

**Size of Communities Ranges from 10,811 to 135,987:** Nine of the 14 communities in the "Top 10" each have more than 30,000 public school students. The smallest community in the "Top 10" is Pontiac, MI, and the largest one is Detroit.

4 of the 6 Big Charter States Represented in the "Top 10": As the state with the sixth highest number of students enrolled in charters, Ohio had the most communities on our list with four. Michigan, which is the #3 charter state, had the second-highest number of communities with three – all in the Detroit metropolitan area. Arizona (the #4 state) had two communities on our list and Texas (the #5 charter state) had one community on our list. California and Florida, the #1 and #2 states in terms of charter student population, have no communities in the "Top 10." For a list of states by charter market share, see Appendix B on pp. 6-7.

#### A Note About Methodology

In this analysis, we examined market share in communities with more than 10,000 public school students (both charter and non-charter) in the 2007-08 school year. We gathered charter and non-charter public school enrollment data from state department of education personnel and databases and from state charter association and resource center staff.

The growing numbers of virtual charter schools that enroll children from across an entire state present another issue. Because many states haven't developed student enrollment reporting systems that allow the sorting of individual students by community of residence at each charter school, we excluded communities where virtual charter schools enrolling large numbers of students from outside the community constituted much of the charter market share in that community. We recognize that this decision might create some undercounting in communities of residence.

After gathering the data, we determined the ten highest market share percentages: 55, 31, 28, 25, 24, 23, 22, 21, 20, and 19. As shown above, some of these percentages included multiple communities.

Anna Nicotera, Director of Research and Evaluation at the National Alliance for Public Charter Schools, provided significant help in gathering the data for this report.
